

## Artificial Intelligence Usage Texoma Christian School

The use of Artificial Intelligence (hereafter AI) in education has become more prominent with the introduction of chatbots such as CHATgpt, Bard, and others. With regard to TCS academic policy, students, parents, and faculty should note the following:

- Students must have the expressed written permission of their teacher of record to use such tools on any type of assignment.
- Use of such tools without expressed written permission could be considered plagiarism and related academic policy consequences would apply to the situation.
- TCS does not specifically discourage the use of AI and Chabots in assignments guided by faculty with faculty permission. Like Google, Wikipedia, and Grammarly, some AI tools do have some educational merit under parameters set by faculty. However, students should be advised that teachers can use AI detection devices as a counter to plagiarism.
- If a student has consent to use an AI tool for an assignment and if that assignment requires documentation of sources used, the tool and its output should be properly documented with citations.
